Education

- Sri Muthukumaran College of Arts & Science, Chennai, Tamil Nadu, India (Aug 2022 - May 2025)
BCA | CGPA: 6.5/10
- St. Ann's Matric Hr. Sec. School, Chennai, Tamil Nadu, India (May 2021)
HSC | 90.5%
- St. Ann's Matric Hr. Sec. School, Chennai, Tamil Nadu, India (May 2019)
SSLC | 90.8%

Technical Skills

Frontend Technologies:

- Web Technologies (HTML, CSS, JavaScript)
- React.js

Backend Technologies:

- Core Java (OOP's, Exception Handling, Multi-threading)
- Advanced Java (Servlets, JSP, JDBC)

Databases:

- MySQL
- Oracle SQL
- MongoDB (Basics)

Soft Skills

- Problem-Solving
- Resource Management
- English Communication
- Adaptable & Reliable
- Teamwork & Collaboration

Volunteer Experience

- Debugging Coordinator** - GEEKFEST 2025, Annual Tech Symposium, Sri Muthukumaran College.

Executive Summary

A self-driven tech enthusiast with a Bachelor's degree in Computer Applications, passionate about building real-world solutions through creative coding. I enjoy working across front-end and back-end, with key skills in programming with web technologies, java, and SQL. I'm always eager to learn, collaborate, and grow through practical challenges along with the organization.

Projects

Fault-Tolerant Blockchain-Based Data Storage System (Academic Project)

Java | Swing | MySQL | ECIES | Socket Programming

- Built a secure and distributed data storage system using a custom triple-chain blockchain model with fault-tolerant recovery and 24 interactive GUI modules, enabling encrypted data flow between nodes through ECIES and socket-based communication.
- Gained experience in building decentralized systems, implementing end-to-end encryption, and managing real-time communication between distributed components.
- Aimed to enhance data integrity and availability in critical sectors like healthcare and legal records, with the potential to reduce single-point failures and data loss by over 70% in traditional centralized systems.

React-Based News Web Application (Academic Project – Naan Mudhalvan Initiative)

React | Axios | React Router | Bootstrap ([Link](#))

- Developed a responsive single-page application (SPA) that fetches and displays real-time news updates using third-party APIs, with modular UI components, dynamic routing, and efficient state handling.
- Strengthened front-end development skills, particularly in building API-driven interfaces, routing strategies, and responsive design principles.
- Designed to improve public access to reliable information, contributing to faster and more convenient news consumption for users — potentially increasing engagement and awareness by 60–70% compared to static platforms.

Personal Portfolio Website (Personal Project)

HTML | CSS | JavaScript | GitHub Pages ([Link](#))

- Designed and built a responsive, visually clean personal website to showcase academic projects, technical skills, and certifications, ensuring smooth navigation and optimized layout across devices.
- Enhanced front-end development abilities and gained experience in version control and web deployment using GitHub Pages.

Certifications

- Core & Advanced Java** - FIIT Formacion Pvt Ltd (Issued Jan 2023)
- MongoDB Node.js Developer Path** (Issued Aug 2024)
- MongoDB Database Admin Path** (Issued Mar 2025)
- MySQL** - Udemy (Issued Feb 2025)
- JavaScript Bootcamp** - Let's Upgrade (Issued Mar 2025)
